UP ANSES - Nancy Laboratory for Hydrology

OTHER SUPERVISORY BODIES
Agence Nationale Sécurité Sanitaire Alimentaire Nationale

UNIT MANAGER
Jean-françois MUNOZ

LOCATION
Region : Grand Est (Nancy)
University site : Université de Lorraine
Address : 40 rue Lionnois - 54000 Nancy

The Laboratory is developing a study and research programme on the whole water cycle, the quality of raw water used to produce drinking water and its treatment, and bottled water. It deals with requests for importing bottled natural mineral water. It also conducts research on the chemistry and microbiology of water. Research activities :
• Assessing the persistence of plant protection products with regard to the quality of water resources intended for human consumption
• Bottled water: assessment of migratory phenomena in water bottling materials
• Study of disinfection by-products in drinking water supply systems
